

In your hand you have a uniquely designed sticker decal from [www.originalpeople.net](http://www.originalpeople.net)

The decal is made of a high quality vinyl. Decorate your car, boat, tablet, caravan, mailbox, door, laptop, mobile or any flat surface.

Each decal is handmade by our family.

Best regards,

The Svenssons

## IMPORTANT

Clean the surface thoroughly!  
Use e.g. detergent or glass cleaner.

Don't apply the decal on cold glass.  
It has to be at least 12 degrees Celsius.

## INSTRUCTIONS

1 Clean the surface. Use a credit card or nail to rub the lines/details, ensuring that all the small parts are stuck to the thin mounting paper/film.

2 Separate the thicker paper from the thin, starting in one corner. Be sure to bend the thicker paper in a backwards motion while holding the thin film steady. If a detail stays on the thicker paper, reapply the thin film to the thick paper and rub again with the card.

3 Remove the thicker paper and apply the film with the sticker against the surface you have chosen. When the sticker has been applied, massage over the figures to ensure they are stuck and all air bubbles are removed.

4 Remove the mounting film in a sharp angle, start in one of the corners working your way across. If a part of the sticker follows the film, reapply the film and rub over the figure again.
